

Ham Rong Proposed Cultural and Historical Site

Alternative site name(s)

Ham Rong-Thanh Hoa

Province(s)

Thanh Hoa

Area

226 ha

Coordinates

19°50'N, 105°48'E

Agro-ecological zone

North Central Coast

Decreed by government

No

Management board established

Yes

Investment plan prepared

Yes

VCF eligibility criteria met

C

Social screening criteria met

None

Conservation needs assessment prepared

No

Operational management plan prepared

No

Tracking tool completed

No

Map available

Yes

Management history

Ham Rong proposed cultural and historical site is not included on any government decision or official set of proposals regarding the national Special-use Forests network (MARD 1997, FPD 2003). However, according to Thanh Hoa Provincial FPD (*in litt.* 2000), an investment plan was prepared for Ham Rong in 1994, which proposed establishing a 226 ha cultural and historical site. This investment plan was approved by the former Ministry of Forestry on 18 March 1994, by Official Letter No. 53/KH-LN, and by Thanh Hoa Provincial People's Committee on 25 January 1995, by Decision No. 72/NN-UBTH. A management board for the site was established on 26 February 1995, following Decision No. 675/NN-UBTH of Thanh Hoa Provincial People's Committee. The management board has five members of staff and is under the management of Thanh Hoa City People's Committee (Thanh Hoa Provincial FPD *in litt.* 2000).

Topography and hydrology

Ham Rong proposed cultural and historical site is located in Dong Son district and Thanh Hoa city, on the banks of the Ma river. In English, Ham Rong means “dragon’s jaws”. The name refers to a range of limestone hills on the western side of the Ma river, 4 km north of Thanh Hoa city, which is thought to be shaped like a dragon’s body. The limestone hills

contain several large caves. The elevation of the site ranges from sea level to c.100 m.

Biodiversity values

The main habitat type at Ham Rong proposed cultural and historical site is limestone karst without forest. There is very little natural forest remaining at the site, and the site is thought to support low levels of biodiversity.

Conservation issues

Ham Rong proposed cultural and historical site is situated in an area of high human population density and has been exposed to high levels of human impact for many years. As a result of human activities, the natural forest cover of the site has been largely lost. Thanh Hoa Provincial FPD (*in litt.* 2000) identify the major threats to biodiversity at the site to be illegal exploitation of forest products and forest fire. Due to its small area, its limited biodiversity values, and the high levels of human impact, the site can be considered to be of little or no importance for conservation.

Other documented values

Ham Rong proposed cultural and historical site is an established destination for domestic tourists. There are several features of the site that are of interest to visitors. First, there are a number of caves at the site, which contain beautiful formations of stalagmites and

Ham Rong Proposed Cultural and Historical Site

stalactites. Second, there are several temples in the hills. Third, the Ham Rong bridge, which spans the Ma river, achieved fame during the American War, when more than 70 US aircraft were shot down trying to destroy the heavily defended bridge (Dodd and Lewis 1996).

Related projects

The construction of a new bridge to carry National Highway 1 across the Ma river has resulted in some disturbance to the site.

Conservation needs assessment

A conservation needs assessment has not been conducted for the site.

Operational management plan

An operational management plan has not been prepared for the site.

Eligibility against VCF criteria

Ham Rong is ineligible for VCF support because it does not meet the criteria for supporting forest biodiversity of international importance. In addition, Ham Rong is a cultural and historical site.

Criterion	Eligibility
A _I	
A _{II}	
B _I	Proposed Special-use Forest
B _{II}	
B _{III}	Under provincial management
C _I	Management board established
C _{II}	

Social screening requirements

A social screening report has not been prepared for the site.

Criterion	Eligibility
